

INSTALLATION SUPPORT

Cloacina offers two optional packages that can be customized to assist Clients with site services and the installation of their Cloacina equipment:

Package I - Site Support: This package is for Clients that have already engaged an installation contractor or plan to have site staff install their Cloacina equipment, but would benefit from pre-construction support and installation oversight from a Cloacina Representative.

Package II - Site Installation: This package is for Clients that prefer Cloacina to provide the major installation and pre-commissioning services for the Cloacina-provided equipment.

PACKAGE I - SITE SUPPORT

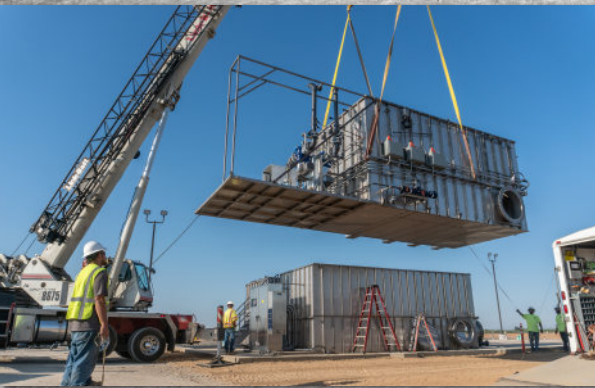

A Cloacina representative will oversee the installation of your Cloacina supplied equipment by a third party. Typical services include:

PRE-CONSTRUCTION SUPPORT

- Design coordination with client and general contractor
- Review of building and regulatory permits
- Project Schedule review
- Weekly design and client coordination meeting attendance
- Site visits for pre-construction and site readiness inspections
- Trucking and freight coordination with Client and General Contractor
- Inventory, audit and receiving coordination with client and general contractor

INSTALLATION AND START-UP OVERSIGHT

- Site visit(s) for installation supervision and pre-commissioning
- Contractor support through factory start-up

PACKAGE II - SITE INSTALLATION

Cloacina provided installation and pre-commissioning services for the Cloacina-provided equipment. Typical services include:

PRE-CONSTRUCTION SUPPORT

- Design coordination with client and general contractor
- Building and Regulatory Permit review
- Project Schedule review
- Weekly design and client coordination meeting attendance
- Site visits for pre-construction and site readiness inspections

FREIGHT AND LOGISTICS SUPPORT

- Client and site coordination
- Freight coordination

SHIPPING AND RECEIVING OF CLOACINA-SUPPLIED TANKS AND EQUIPMENT

- Anchoring of tanks and equipment skids
- Upfit and reassembly of the Cloacina-supplied equipment
- Additional services available:
 - Above grade PVC pipe connections to Cloacina tank nozzle
 - Conduit connections to Cloacina local control panels

PRE-COMMISSIONING AND START-UP SERVICES

- Complete pre-commissioning tasks in preparation for factory start-up procedures
- Provide onsite assistance during the initial factory start-up period
